ARCHITECTURAL WINDOWS, DOORS AND MILLWORK

Custom *&* Standard finishes

Explore our stain finishes brochure for a range of standard and custom colors that highlight natural beauty. We craft unique blends with advanced water-based technology for lasting protection. **Trust us to bring your vision to life!**

Custom

Our finishes utilize advanced water-based technology to provide long-lasting protection while enhancing the natural beauty of materials, giving a matte or shiny look.

Our finishes protect the wood from photodegradation by incorporating UV-resistant pigments and absorbers, ensuring vibrant, sunlight-resistant colors that withstand harsh weather conditions. Also, we can develop stains that match 100% of stain samples from architects or designers!

By applying wood stain we create a shield to avoid deterioration phenomenon from fungi, bacteria, and insects. Caoba manufactures its products using the highest-performing wood finishes on the market by offering a comprehensive line of both interior and exterior wood finishing solutions. The wood exposed to the outside must be protected with great care from the following factors: sunlight, rain, ice, contamination, sudden changes in temperature, or undesirable hosts (fungi, mold, parasites, etc.) since these factors constantly threaten the beauty of the finishes.

Some water-based additives can prevent the growth of germs on wood surfaces.

Technology

- The strongest protection against the sun's damaging ultraviolet (UV) radiation.
- Reduced emissions of solvents into the atmosphere (Environmentally Friendly)
- Ease of application
- Maximum coverage
- Lack of any risk of combustion during the application process
- Better outdoor aging
- Better Gloss retention
- No Yellowing
- Ease of maintenance

Luxury Finishing:

Ensure top-quality manufacturing for your customers with solutions that meet the UNI 11717-1 standard. This ensures resistance to wood degradation and optimal varnishing cycles for interior carpentry.

By applying high-performance finishes like our products gain exceptional benefits:

- Stronger adhesion to wood
- Reduced fiber overload
- Superior protection
- Ultra-fast drying
- No yellowing over time
- Consistent color uniformity
- Low VOC emissions for a healthier environment
- Choose reliability and excellence with our advanced finishing solutions.

Customization

We have extensive experience in precisely matching custom colors and finishes to our units, particularly for restoration and recreation projects. Our skilled team specializes in color matching to ensure seamless integration with existing windows, doors, and millwork, preserving the original character and design continuity of the project.

Standard

A glimpse of our available Standard Stain Finishes

These samples don't represent all wood characteristics; variations in color may occur according to wood species, grain and finish.

The research into state-of-the-art products is combined with a profound awareness towards environmental issues, and human health. This is reflected in the decisions and activities of the company; all collaborators are always engaged in optimizing processes, products, and services to guarantee the highest levels of safety and reduction of environmental impact.
