ARCHITECTURAL WINDOWS, DOORS AND MILLWORK

Introduction

Discover a glimpse of the decorative hardware options we can provide—but remember, the possibilities are almost limitless. **We specialize in custom solutions, so if it's available on the market, we can get it for you!**

High-quality hardware is essential for windows and doors, enhancing their functionality, security, and style. From antique-inspired designs with a classic charm to sleek, minimalist options, every visible and tactile hardware element serves as a statement piece, adding character and refinement to your unit.

Our offerings include handles, locks, knobs, and every hardware you require for your project. Let us help you select the perfect hardware to ensure your windows and doors perform beautifully and seamlessly.

Sash Locks

Many of our decorative hardware pieces are handcrafted, making each piece unique, just like the Rocky Mountain series. Our team of experts is here to help you choose the right hardware based on your environment and the certification of your units. Hardware must be carefully selected to meet the requirements of each project.

For instance, when selecting sash locks, it's important to consider not just the window's style, but also its weight, dimensions, and the location of the project, so they can meet the environmental needs.

Handles

Handles

EMTEK

Specify left or right-handing

Characteristics
EW 103
Convex Window Escutcheon 1 3/8" x 4 1/2"

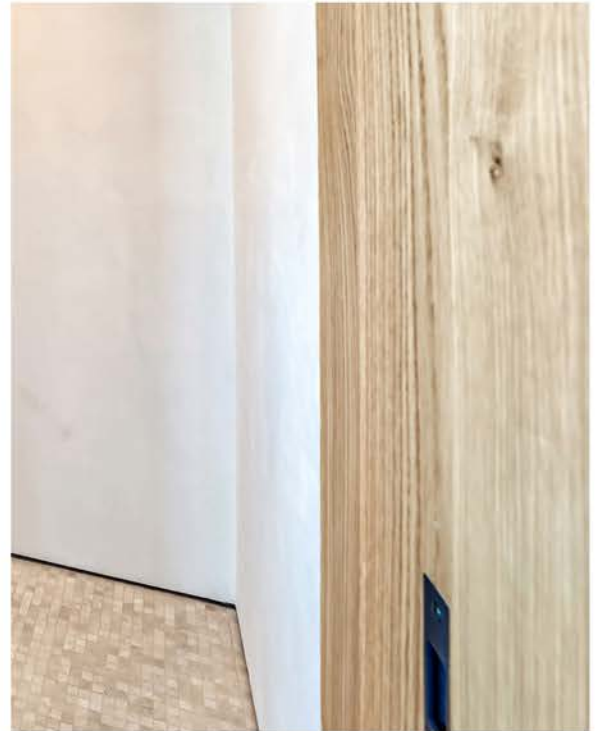

Knobs

Flush Pulls

Flush pulls are designed to effortlessly open and close sliding doors. Some serve both functional and decorative purposes, while others are seamlessly integrated into the wood for a sleek, minimalist aesthetic—like the doors in the Casa Q'Anil house.

Lift & Slide

Please keep in mind that when selecting lift and slide hardware, it's important to consider not just style and aesthetics, but also the environment. For instance, coastal properties require suitable hardware that can withstand salt and moisture.

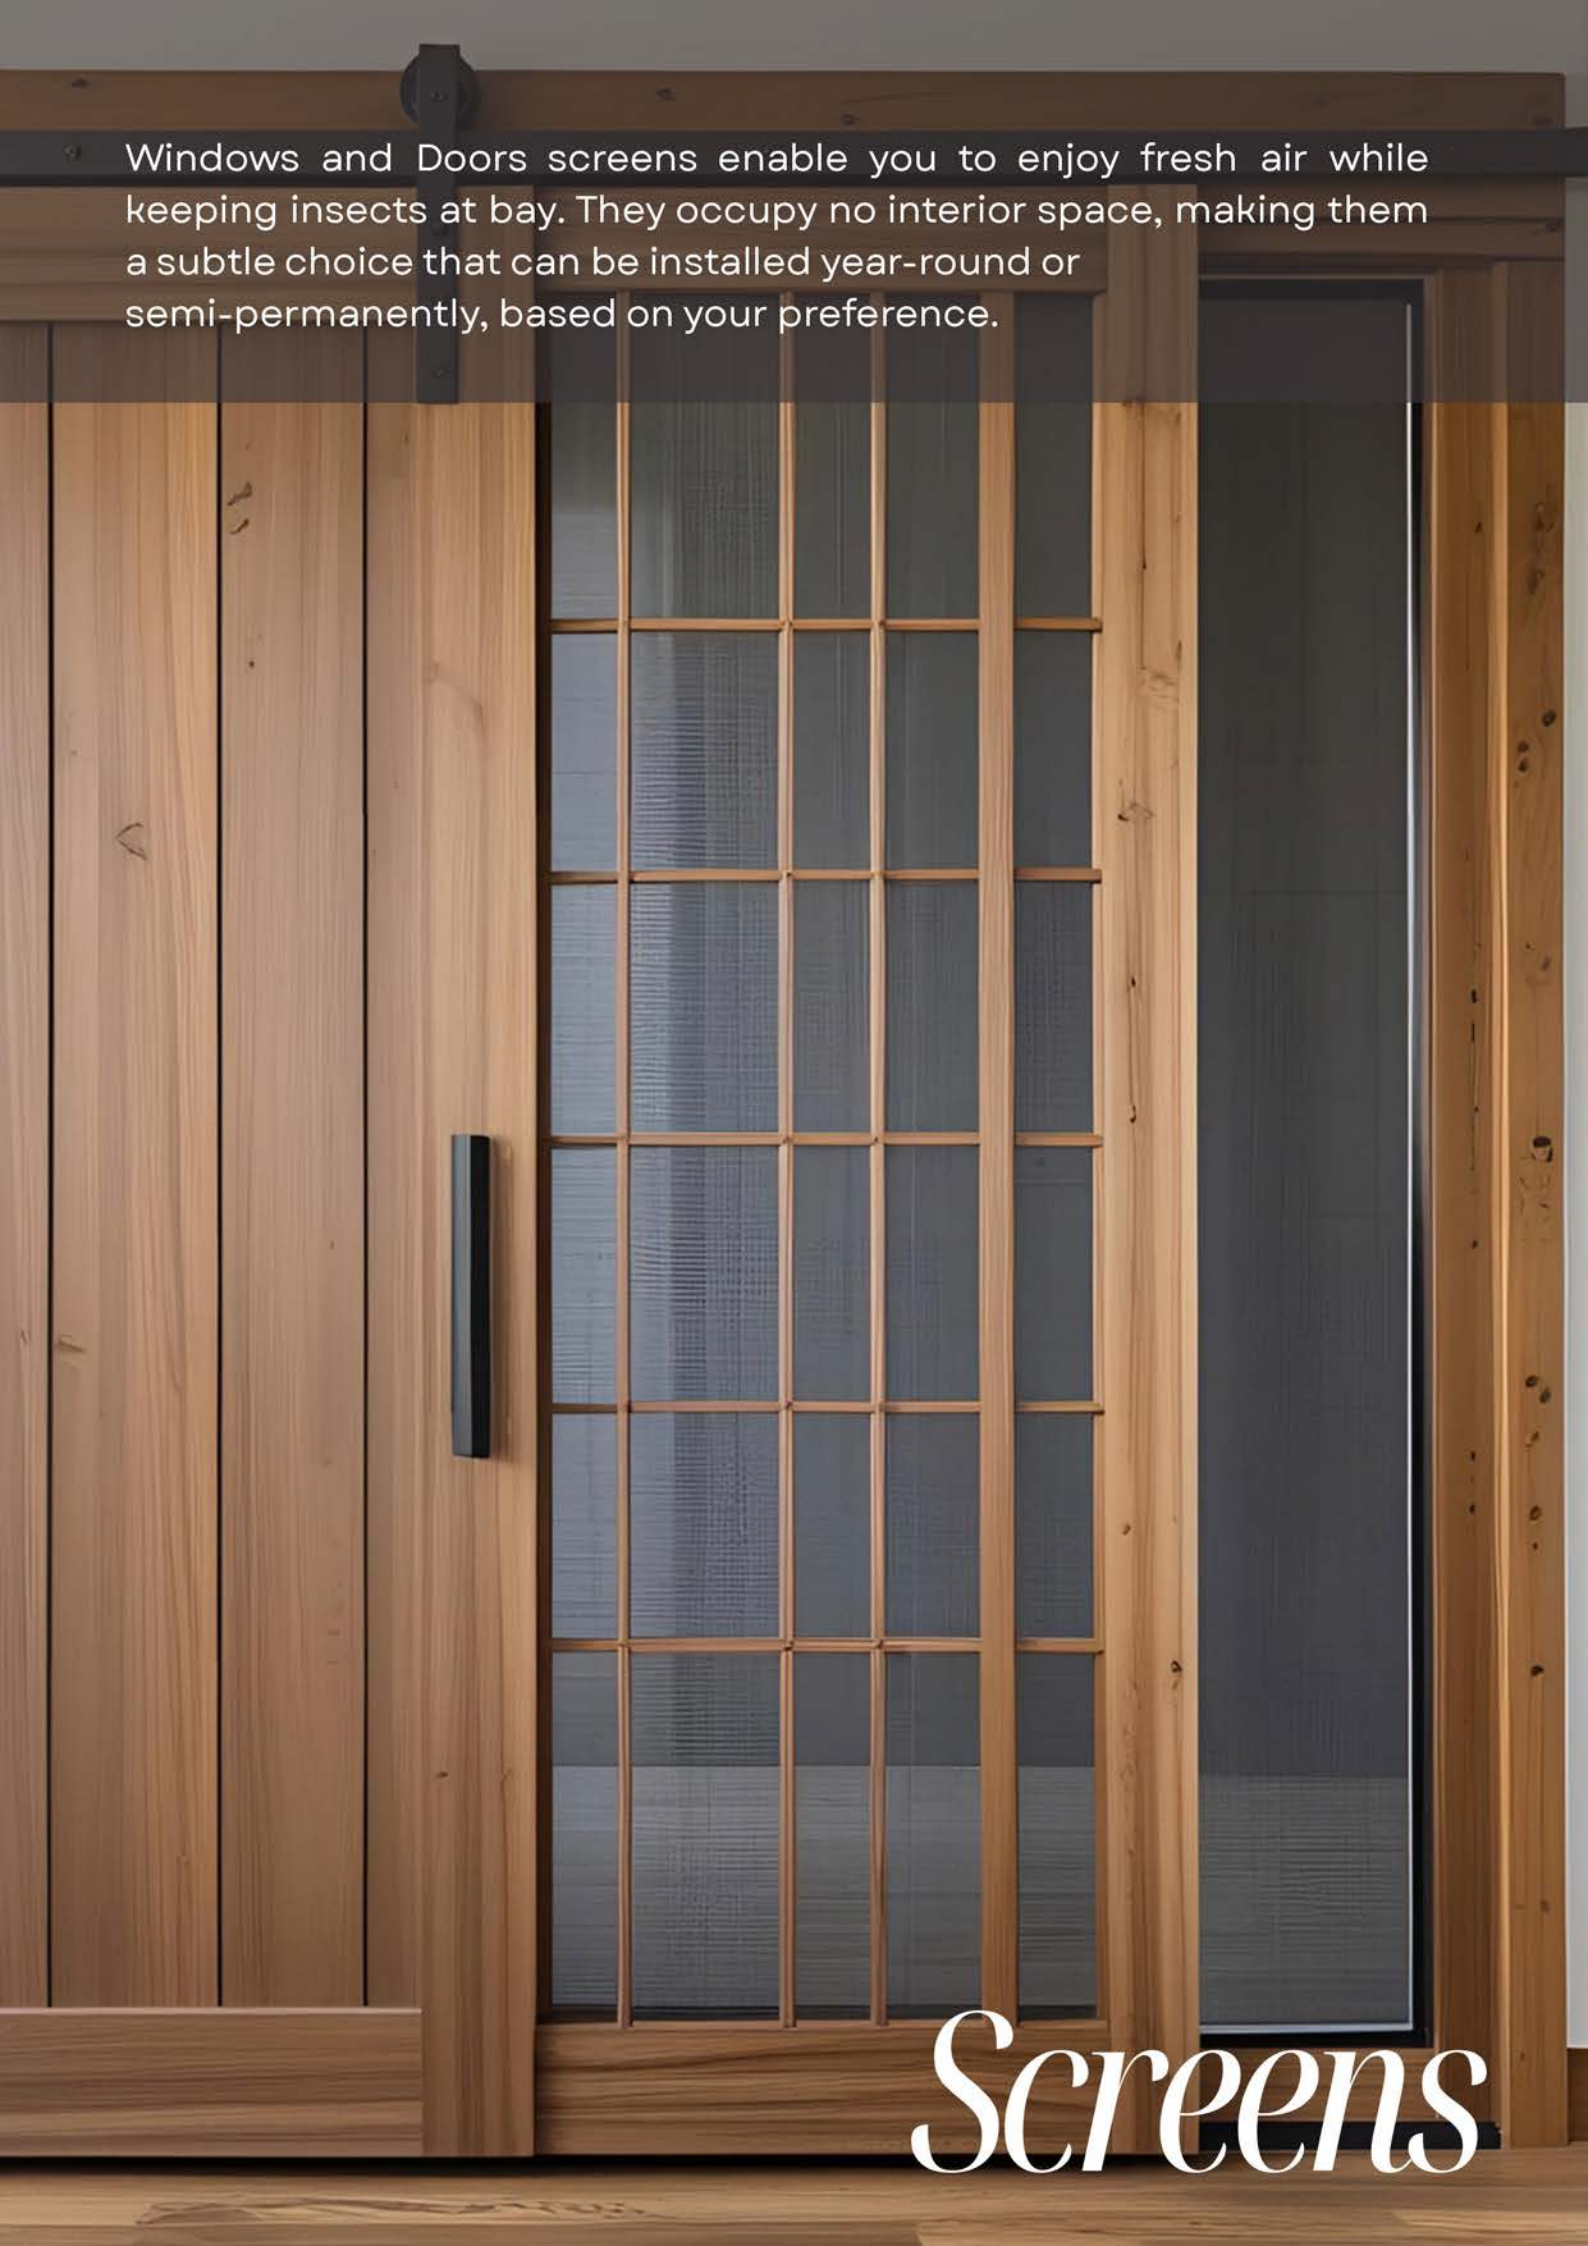

ROCKY MOUNTAIN

GHIDINI

Windows and Doors screens enable you to enjoy fresh air while keeping insects at bay. They occupy no interior space, making them a subtle choice that can be installed year-round or semi-permanently, based on your preference.

A wooden door with a multi-paned glass screen and a wooden shutter. The shutter is on the left, partially open, revealing the screen. The screen is made of wood and has a grid of 12 rectangular panes. The door is set in a wooden frame. The floor is made of wood.
