Introduction

Discover a world of high-quality hardware solutions designed to enhance the functionality, security, and longevity of your windows and doors. From smooth operation to energy efficiency, every component plays a crucial role in performance and ease of use.

At CAOBA, we specialize in custom solutions—if it's available on the market, we can source it for you. Our selection includes hardware for multipoint and pivotal functions, hinges, latches, sills, locks, and more, ensuring seamless integration with your design and operational needs. Also, we can offer you special hardware with a combination of wood and aluminum, depending on your project requirements and style.

Explore our range of hardware options and let us help you select the perfect components for effortless functionality and enduring quality. The possibilities are almost limitless!

Pivot

Pivot System

System One

Model H117 3/4

At Caoba, innovation is at the heart of everything we do. That's why we continually explore new possibilities, such as integrated electronic systems and concealed doorstops, to create a sleek, minimalist aesthetic. Our expert team ensures precise control of door opening angles and seamless electronic closing for both functionality and elegance.

Sills

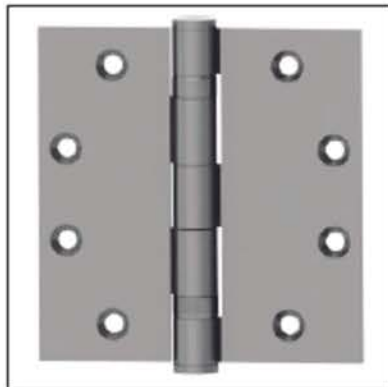

A low-profile door sill designed to meet **ADA standards**, ensuring smooth wheelchair and walker access while providing reliable weather resistance.

Flush threshold sills with stainless steel drain tracks provide a smooth indoor-outdoor transition, eliminating tripping hazards while efficiently directing water away with elegance and durability.

Hinges

BB1191

Technical Information

Features: Non-rising removable pin with button tip and plug. Two ball bearings.

Height: See Sizing Chart Options

Options: NRP (Non-removable pin) / Stamped with UL logo when ordered for export

Deltana

DSB4B

Technical Information

Thickness: 129

Material: Solid Brass

Self-closing hinges and door closing hinges are hinges fitted with a spring, automatically closing the door from an open position.

Hinges

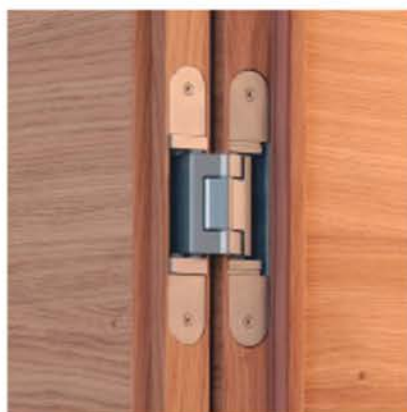

Tectus

240 3D

Technical Information

Capacity: 132 lbs
Widths: 0.82", 0.7"
Height: 6.1"
Min. Door Thickness: 1"

SOSS

418

Technical Information

Application: Full Sized Entry, Metal, Wood
Min. Material Thickness: 1-3/4"
Fire Rating: 90/180 Minutes
Packaging: 1/Box = 1 Each

Drop Bolts

Centor DF

Technical Information

Product Code: DBFO200KRN

Dropbolt: 200mm

Keyed

Finish: Gold Anodised

Centor DF

Rated to resist the most extreme wind conditions (up to 450Kg force in certain timbers) DF dropbolts feature rounded styling and are suited to use with outward opening bifold doors, french doors and sliding doors. Available in 200mm, 400mm, 600mm and 1000mm lengths with a 20mm throw they come in natural and gold anodised, chrome, brushed metallic and custom powdercoated finish.

Centor DO

Technical Information

Product Code: DBOE200KRX

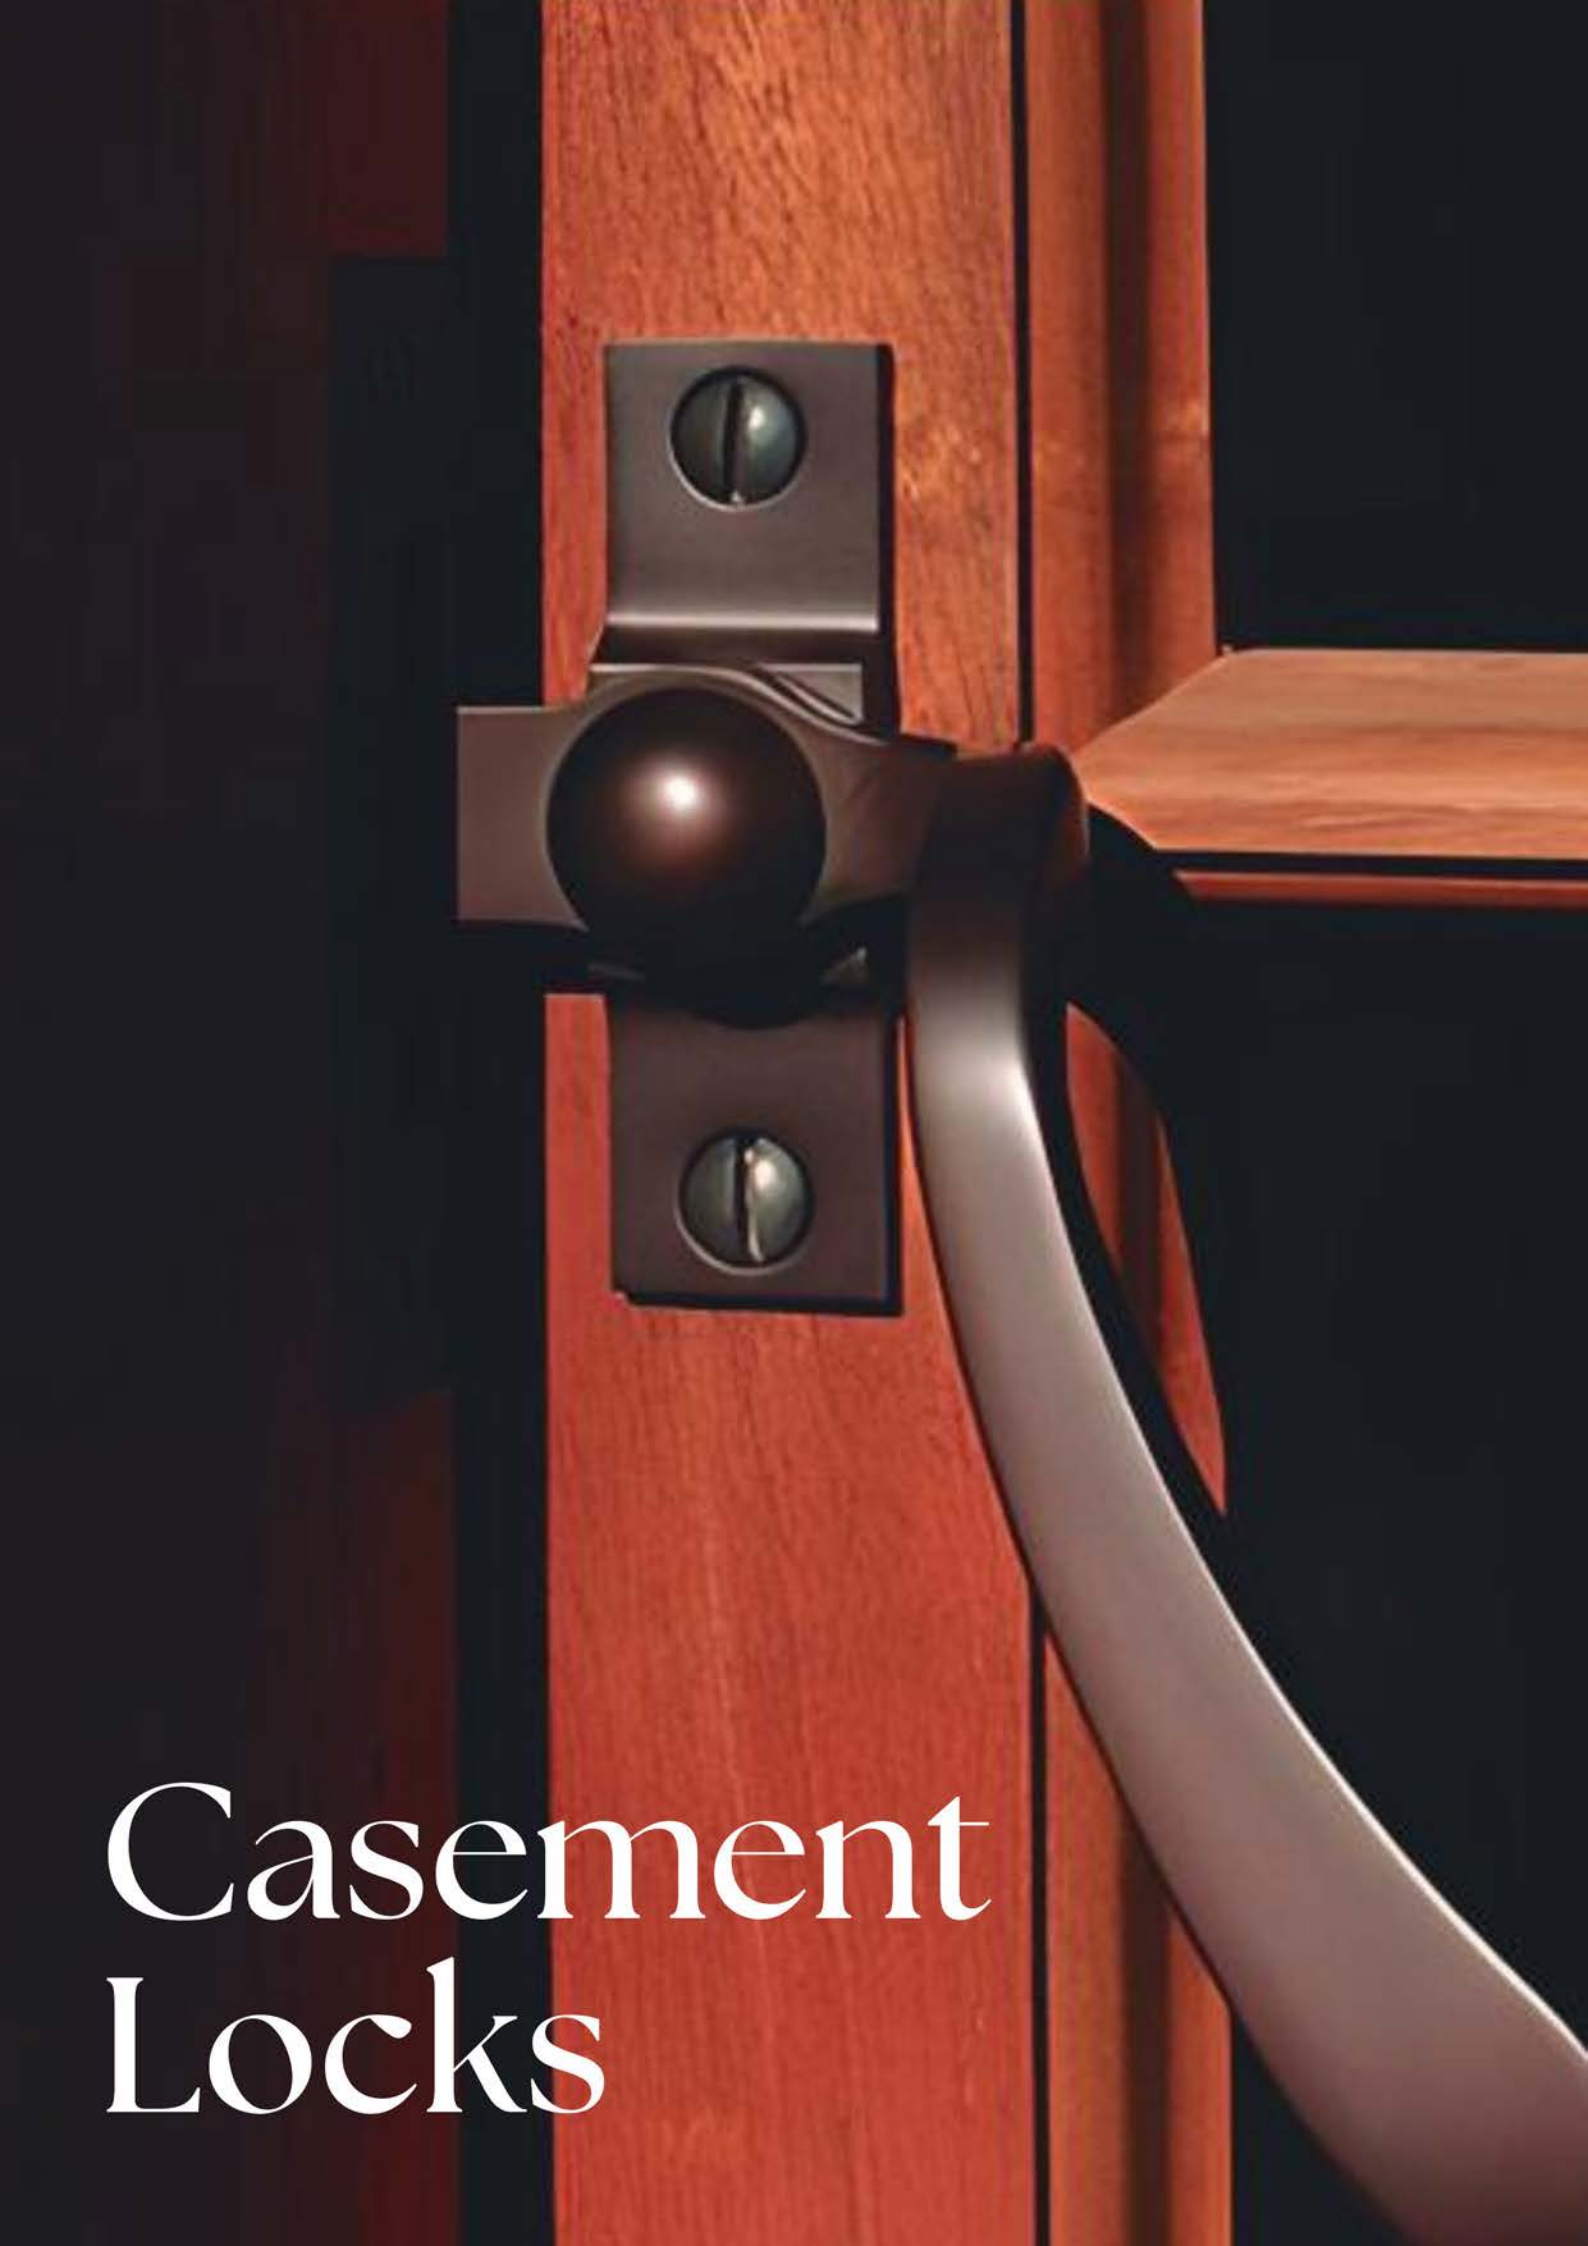

Dropbolt: 200mm

Keyed

Finish: Brushed Metallic

Centor DO

Designed specifically for use with inward opening bifold doors Centor DO comes into its own wherever an offset bolt is required, features an extended 20mm throw. Rated to resist wind conditions up to 200kg force in certain timbers, DO is available in 200mm, 400mm and 600mm lengths. DO comes in natural and gold anodised and brushed metallic finishes. Keyed DO dropbolts feature a unique bifold damage-proofing mechanism which prevents the bolt being operated while the key remains in the lock.

Concealed Balances

Concealed balances for windows are a sophisticated type of hardware designed to counterbalance the window sash, simplifying the process of opening and closing. Unlike older, more conspicuous systems such as weight and chain mechanisms, these balances are discreetly hidden within the window frame. They are commonly employed in both double-hung and single-hung windows.
